RE: Bayview Construction  
Job No. 1775.0

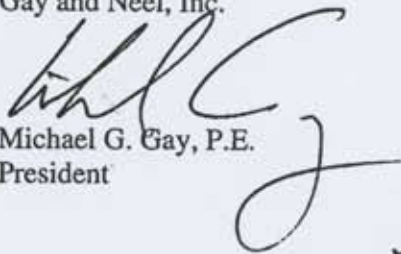

To Whom It May Concern:

Gay and Neel, Inc. has extensive experience in the design, specification, inspection, start-up, and maintenance of a multitude of on-site wastewater systems.

We have observed and verified on a number of occasions that the staff of Bayview Construction has proven to be competent and diligent in the installation of underground facilities, pumped systems, effluent distribution systems, dosing siphons and drainfields. At this time we have no reservations in recommending or providing reference for Bayview Construction for installation of underground septic or effluent facilities.

If you have any questions, please do not hesitate to give me a call.

Sincerely  
Gay and Neel, Inc.

  
Michael G. Gay, P.E.  
President
